(a) More asking is not always safer
threshold guard, no fatigue
threshold guard, with fatigue
attack success rate (%)
confirmations per session
(b) Value of modeling fatigue
DP planned for $C = 5$ (misspecified)
reward per session
user capacity C (confirmations before fatigue)
Fatigue-aware optimal (DP)
Myopic fatigue-aware (Prop. 1)
Static guard (fatigue-unaware)
Always confirm
Autonomous (never ask)
